

## Statistics Seminar

*Salary Data:*

*Using Statistics to Study Equity in Pay*

**Friday, May 3, 2019**

**12:00 – 1:00**

**Derr 339**

**Abstract:** The University Nontenure Line Faculty Committee is interested in using available public data to investigate equity in pay at Texas State University. In this seminar we will examine from the College and University Professional Association for Human Resources (CUPA) and what statistical methods are appropriate to analyze questions about equity. The idea is to discuss different possible approaches and provide an example of statistics applied to a problem of interest to all faculty.

Discussion host: **Dr. Alex White**
