

## Statistics Seminar

***Discussion:  
Dragging Introductory Statistics course  
into 21<sup>st</sup> century***

Friday, March 8, 2019

12:00 – 1:00 PM DERR 339

Much has happened in the world around us as well as in the world of statistics education and statistical practice since 2005, the year of the first GAISE report: the audience, technology tools, job market demand. It is critical to re-evaluate and update our approaches to teaching Elementary Statistics, Math 2328, one of the largest courses taught at the Department of Mathematics. Let's talk about the direction for the future of our introductory statistics course in the light of revised 2016 GAISE College Report recommendations.

Please come to share your thoughts, experience and expectations!

**Discussion Hosts: Vera loudina and Alex White**

Dr. White has a Ph.D. in Statistics from Michigan State University, and is a Professor at the Department of Mathematics, Texas State University.

Dr. loudina has a M.S. in Mathematics and Ph.D. in Economics from Moscow State University of Economics, Statistics, and Informatics, and is a Senior Lecturer at the Department of Mathematics, Texas State University.
